

# Winerack-plus

... the best for your wines

Inspirations for your wine cellar planning

## Customised wine cellar construction

Whether it's a modular wine storage system or a made-to-measure solution according to your wishes, we are happy to provide you with expert advice based on more than 30 years of experience in wine storage and wine-rack construction.

We are a full service provider: planning, material selection, 3D visualisation, production and assembly.

Our service portfolio ranges from simple wine racks to high-quality wine presentation rooms for the highest demands - for private wine cellars, for wineries and for the high-end restaurant and hotel sector.

# Wood

A wine cellar with wooden wine racks is the most natural, ecological and sustainable way to store wine. Wood provides the ideal conditions for long-term wine storage, allowing wine to develop and age.

The choice of wood, its colour, the combination with other materials - the design opportunities for your wine cellar and the presentation of your wines are almost unlimited.

# Metal

If you use metal wine racks to furnish your wine cellar, you have opted for a very resistant and robust material that looks very elegant thanks to its straight lines and slenderness.

Metal shelves give a wine cellar a characteristic, minimalistic look.

# Acrylic

Wine cellars with acrylic wine racks are an absolute eye-catcher. They impress with their modern, puristic design.

The indirect LED lighting adds a futuristic accent.

# Air conditioning, wine storage chambers and wine coolers

wine storage chambers and wine coolers

Made-to-measure wine storage chambers

Exclusive wine coolers

Air conditioners for wine cellars

The air conditioning of wine cellars or wine storage rooms may be needed to ensure the ideal temperature and humidity for the development of wines and to prevent a loss of their value.

Wine storage chambers are the pragmatic solution for wine storage when presentation takes a back seat and efficiency come to the fore.

And wine coolers with one or more temperature zones ensure that wine and sparkling wine are always available at the perfect serving and drinking temperature.

There is a large selection of air conditioning systems, wine storage chambers and wine coolers to suit every need.

# Wine cellar construction with a modular design

It has never been so easy to design and furnish a stylish wine cellar. Our modular wine rack systems offer a quick, user-friendly and expandable solution. Choose from a wide range of materials, colours and designs.

Modular series PRESTIGE

Modular series CAVEPRO
